EFETnet was established by the European Federation of Energy Traders (EFET) an organization founded in 1999 by Europe's leading energy companies and is used for EFET and non-EFET energy trading contracts. EFETnet B.V. is an independent company 100% owned by the EFET.

It was set up in 2004 by EFET to serve those actively involved in energy trading and is intended to deliver the benefits of electronic data exchange standardization that was first pioneered by EFET and its members. More information at www.efetnet.org
