

Metals pro Climate is an initiative which presents and highlights the achievements and potential of the non-ferrous metals industry in climate protection, energy and resource efficiency. Best practice examples underline the expertise of the non-ferrous metals industry. Non-ferrous metals - basic material creating the future.

## Securing Europe's Raw Material Supply in the Context of EU Resource Efficiency and Industry Policy

There is no energy- and resource efficiency, no climate protection, no future technologies for our modern world without the use of non-ferrous metals.

14th November 2012 • 6 p.m. • Brussels
